

# Louisiana State University Agricultural Center

Effective Date: December 14, 2017

AG CENTER PS-16

Revision: 02

## LSU Agricultural Center Policy and Procedures to Address Alleged Misconduct in Research

### I. Introduction

#### A. General Policy

Louisiana State University Agricultural Center (AgCenter) has a commitment to high ethical standards in research and scholarship, and expects that all personnel serving in any capacity in research will work to ensure the integrity of science and scholarship. In the event of possible deviation from these standards, LSU AgCenter provides this policy and administrative procedure to review reports of alleged research misconduct. The procedures do not create any right or benefit, substantive or procedural, enforceable at law by a party against the institution, its agencies, or employees. Definitions of terms used in this policy are found in section II.

The primary responsibility for detecting, investigating, reporting and resolving allegations of research misconduct rests with the AgCenter. If warranted, the AgCenter must take whatever action is necessary to ensure the integrity of research; the rights and interests of research subjects, the public, the respondent, and the complainant; and the observance of relevant legal requirements.

#### B. Scope

This policy and its procedures apply to all individuals at LSU AgCenter engaged in research or scholarship, including any person paid by, under the control of, or affiliated with LSU AgCenter, such as scientists, trainees, technicians and other staff members, students, fellows, guest researchers, or collaborators at LSU AgCenter, regardless of whether on or off campus.

This policy and associated procedures will normally be followed when an allegation of possible research misconduct is received by an institutional official or when for any reason research misconduct is suspected. Any change from normal procedures must ensure fair treatment to the subject of the inquiry or investigation and to the complainant. Any significant departure from these procedures must be approved in advance by the Vice President for Agriculture/Chancellor.

**Note:** violations of regulations concerning human or animal research subjects, biosafety, recombinant DNA, or financial conflicts of interest are addressed in other policies. These policies shall not be applicable to the present policy unless research misconduct is also alleged.

#### C. Research Misconduct

1. Research misconduct means fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results.
  - a. Fabrication is making up data or results and recording or reporting them.

- b. Falsification is manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.
  - c. Plagiarism is the appropriation of another person's ideas, processes, results, or words without giving appropriate credit.
  - d. Research misconduct does not include honest error or differences of opinion.
2. A finding of research misconduct requires that—
- a. There be a significant departure from accepted practices of the relevant research community; and
  - b. The misconduct be committed intentionally, knowingly, or recklessly; and
  - c. The allegation be proven by a preponderance of the evidence. [1]

#### D. Time Limitation

The research misconduct must have occurred within six years of the date LSU AgCenter receives an allegation of research misconduct with the following exceptions:

- 1. Subsequent use exception. The respondent continues or renews any incident of alleged research misconduct that occurred before the six-year limitation through the citation, republication or other use for the potential benefit of the respondent of the research record that is alleged to have been fabricated, falsified, or plagiarized.
- 2. Health or safety of the public exception. If LSU AgCenter determines that the alleged misconduct, if it occurred, would possibly have a substantial adverse effect on the health or safety of the public. [1]

#### E. Evidentiary Standards

The following evidentiary standards apply to findings made under this policy:

- 1. Standard of proof. An institutional finding of research misconduct must be proved by preponderance of the evidence. [1]
- 2. Burden of proof.
  - a. LSU AgCenter has the burden of proof for making a finding of research misconduct. The destruction, absence of, or respondent's failure to provide research records adequately documenting the questioned research is evidence of research misconduct where LSU AgCenter establishes by a preponderance of the evidence that the respondent intentionally, knowingly, or recklessly had research records and destroyed them, had the opportunity to maintain the records but did not do so, or maintained the records and failed to produce them in a timely manner and that the respondent's conduct constitutes a significant departure from accepted practices of the relevant research community.
  - b. The respondent has the burden of going forward with and the burden of proving, by a preponderance of the evidence, any and all affirmative defenses raised. In determining whether LSU AgCenter has carried the burden of proof, the finder of fact shall give due consideration to admissible, credible evidence of honest error or difference of opinion presented by the respondent.
  - c. The respondent has the burden of going forward with and proving by a preponderance of the evidence any mitigating factors that are relevant to a decision to impose administrative actions following a research misconduct proceeding. [1]

#### F. Responsibility to Report Misconduct

All covered individuals associated with LSU AgCenter should report observed, suspected, or apparent research misconduct to one of the two AgCenter Research Integrity Officers (RIO), who are the Associate

Vice President and Program Leader for Animal Sciences or the Associate Vice President and Program Leader for Plant Sciences. While it is suggested that the matter be brought to the Associate Vice President and Program whose discipline mostly aligns with the matter in question, individuals are free to direct the issue to either one. The Vice-President/Chancellor may also designate other individuals to receive reports. If an individual is unsure whether a suspected incident falls within the definition of research misconduct, he or she may call the RIO at 225-578-4161 to discuss the suspected research misconduct informally. If the circumstances described by the individual do not meet the definition of research misconduct, the RIO may refer the individual or allegation to other offices or officials with responsibility for resolving the problem. If the circumstances meet the definition of research misconduct, the RIO must proceed in accordance with the procedures described below.

At any time, a covered individual may have confidential discussions and consultations about concerns of possible research misconduct with the RIO and will be counseled about appropriate procedures for reporting allegations. NOTE: At any such time that the AgCenter has an Ombudsperson, reporting an incident to the AgCenter Ombudsperson shall not constitute notice to the AgCenter. The Ombudsperson, however, shall make strong efforts to encourage the individual to report the incident to the RIO.

#### G. Cooperation with Inquiries and Investigations

Covered individuals will cooperate with the RIO and other institutional officials in the review of allegations and the conduct of inquiries and investigations, and they have an obligation to provide relevant evidence to the RIO or other institutional officials on research misconduct allegations.

#### H. Confidentiality

Except as herein provided, maintenance of confidentiality of all aspects of an allegation of research misconduct, and subsequent inquiries and investigations of the allegation, is required of all individuals knowledgeable of the alleged research misconduct or allegation. Complainants must respect the confidentiality of sensitive information and give legitimate institutional procedures an opportunity to function. Should a complainant elect to make a disclosure that violates institutional rules of confidentiality, the institution may thereafter legitimately limit the complainant's access to further information about the case, or take additional precautionary measures. Disclosures by any participants during the process may make that person subject to institutional action beyond any remedy sought by any person injured by that disclosure. Disclosures may be made or authorized to facilitate this administrative process.

## II. Definitions

A. *Allegation* means a disclosure of possible research misconduct through any means of communication. The disclosure may be by written or oral statement or other communication to an institutional or HHS official [1]. The disclosure may also be to other relevant funding agencies. The RIO may require that an allegation be made in writing in order to process a charge of misconduct.

B. *Complainant* means a person who in good faith makes an allegation of research misconduct [1].

C. *Conflict of interest* means the real or apparent interference of one person's interests with the interests of another person, where potential bias in these procedures may occur due to prior or existing personal or professional relationships.

D. *Covered individual* means all individuals associated with LSU AgCenter engaged in research or scholarship, including any person paid by, under the control of, or affiliated with LSU AgCenter, such as scientists, trainees, technicians and other staff members, students, fellows, guest researchers, or collaborators at LSU AgCenter, regardless of whether on or off campus.

E. *Deciding Official (DO)* means the institutional official who makes final determinations on allegations of research misconduct and any responsive institutional actions. The Deciding Official for LSU AgCenter is the Vice President/Chancellor.

F. *Evidence* means any document, tangible item, or testimony offered or obtained during a research misconduct proceeding that tends to prove or disprove the existence of an alleged fact [1].

G. *Good faith allegation* means an allegation made with the honest belief that research misconduct may have occurred. An allegation is not in good faith if it is made with reckless disregard for or willful ignorance of facts that would disprove the allegation.

H. *Inquiry* means gathering information and preliminary fact-finding to determine whether an allegation or apparent instance of research misconduct warrants an investigation.

I. *Inquiry Committee* means a committee of three or more senior tenured faculty members (or other appropriate professionals) experienced in research, appointed by the Vice President/Chancellor taking into consideration the recommendations of the RIO. The Vice President/Chancellor may also consider recommendations from the The Vice President/Chancellor may also consider recommendations from other AgCenter faculty holding the role of Associate President and Program Leader, if different from the RIO. If the inquiry concerns an individual who holds a joint appointment with another campus, a recommendation from the Dean of the College, or Executive Associate Dean of the College of Agriculture, or equivalent, may be considered.

J. *Investigation* means the formal development of a factual record and the examination of that record leading to a decision not to make a finding of research misconduct or to a recommendation for a finding of research misconduct which may include a recommendation for other appropriate actions, including administrative actions [1].

K. *Investigative Committee* means a committee of a minimum of four senior tenured faculty members (or other appropriate professionals), at least three of whom have expertise in the research area in question, to be appointed by the Vice President/Chancellor taking into consideration the recommendations of the RIO. The Vice President/Chancellor may also consider recommendations from other AgCenter faculty who hold the role of Associate Vice President and Program Leader, if different from the RIO. If the inquiry concerns an individual who holds a joint appointment with another campus, a recommendation from the Dean of the College, or Executive Associate Dean of the College of Agriculture, or equivalent, may be considered. Investigative Committee members will not ordinarily include individuals who served on the Inquiry Committee. An attorney may be retained to serve in an advisory capacity, and a recording secretary will be designated to record the proceedings of the meetings. Deliberations and attorney-client communications will not be recorded.

L. *Office of Research Integrity* means the office to which the US Department of Health and Human Services (HHS) has delegated responsibility for addressing research integrity and misconduct issues related to the US Public Health Service supported activities.

M. *Plagiarism* is the appropriation of another person's ideas, processes, results, or words without giving appropriate credit [1]. It does not include authorship or credit disputes. Plagiarism which takes the form of theft or misappropriation of intellectual property includes the unauthorized use of ideas or unique methods obtained via privileged communication, such as a grant or manuscript review.

N. *Preponderance of the evidence* means proof by information that, compared with that opposing it, leads to the conclusion that the fact at issue is more probably true than not [1].

O. *Research* means a systematic experiment, study, evaluation, demonstration or survey designed to develop or contribute to general knowledge (basic research) or specific knowledge (applied research).

P. *Research Integrity Officer* means the institutional official responsible for assessing allegations of research misconduct and determining when such allegations warrant inquiries and for overseeing inquiries and investigations. The two Research Integrity Officers (RIO) for LSU AgCenter are the

Associate Vice President and Program Leader for Animal Sciences and the Associate Vice President and Program Leader for Plant Sciences.

Q. *Research record* means the record of data or results that embody the facts resulting from scientific inquiry, including but not limited to, research proposals, laboratory records, both physical and electronic, progress reports, abstracts, theses, dissertations, oral presentations, internal reports, journal articles, and any documents and materials provided to HHS or an institutional official by a respondent in the course of the research misconduct proceeding [1]. It also includes any documents and materials provided to other relevant funding agencies.

R. *Research misconduct* – See definition in section I.C.

S. *Respondent* means the person against whom an allegation of research misconduct is directed or the person whose actions are the subject of the inquiry or investigation. There can be more than one respondent in any inquiry or investigation.

T. *Retaliation* means any action taken by an institution or an employee that adversely affects the employment or other institutional status of an individual because that individual (1) has in good faith made an allegation of research misconduct, (2) has cooperated in good faith with an investigation of such allegation, or (3) charges inadequate institutional response to an allegation.

### **III. Rights and Responsibilities**

#### **A. Research Integrity Officer**

The Associate Vice President and Program Leader for Animal Sciences and the Associate Vice President and Program Leader for Plant Sciences will serve as the Research Integrity Officers (RIO), unless otherwise designated by the Vice President/Chancellor, and will have primary responsibility for implementation of the procedures set forth in this document. The RIO will recommend to the Vice President/Chancellor appointments to the Inquiry and Investigative Committees and ensure that necessary and appropriate expertise is secured to carry out a thorough and authoritative evaluation of the relevant evidence in an inquiry or investigation. The RIO will make every reasonable effort to ensure that confidentiality is maintained.

The RIO will initially assess the allegation, will determine whether to proceed with an inquiry, and will assist appointed Inquiry and Investigative Committees and all institutional personnel in complying with these procedures and with applicable standards imposed by government or external funding sources. The RIO is also responsible for maintaining files of all documents and evidence and for the confidentiality and the security of the files.

#### **B. Complainant**

If the RIO determines it is appropriate, the complainant may be officially informed in writing that an inquiry has been opened, and may be notified of the final determinations, but will not necessarily be informed of any recommended or imposed personnel actions taken. He or she may also be officially notified in the event that no inquiry or investigation is initiated. The complainant will have an opportunity to testify before the Inquiry and Investigative Committees. The RIO may allow the complainant to review and comment on the accuracy of the portions of the inquiry and investigation draft reports containing his or her allegations or testimony and to be informed of the results of the inquiry and investigation. If the RIO has determined that the complainant may be able to provide pertinent information on other portions of the draft report, these portions will be given to the complainant for comment.

The complainant is responsible for making allegations in good faith, maintaining confidentiality, and cooperating with an inquiry or investigation.

#### **C. Respondent**

The respondent will be officially informed in writing of the allegations if an inquiry is opened. The respondent will also have the opportunity to be interviewed by and present evidence to the Inquiry and Investigative Committees, to review summaries of interviews by Inquiry and Investigative Committees, to review the draft inquiry and investigation reports, and to have the advice of counsel. The respondent will be notified in writing of the final determinations and resulting actions.

The respondent is responsible for maintaining confidentiality and cooperating with the conduct of an inquiry or investigation. If the respondent is not found guilty of research misconduct, he or she has the right to receive reasonable institutional assistance in restoring his or her reputation.

#### D. Deciding Official

The Deciding Official (DO) will receive the inquiry and/or investigation report and any written comments made by the respondent or the complainant on the draft report. The Deciding Official will consult with the RIO or other appropriate officials and will determine whether to conduct an investigation, whether research misconduct occurred, whether to impose sanctions, or whether to take other appropriate administrative actions [see section X].

As required by law, or as deemed appropriate, the Deciding Official will keep all relevant external funding agencies apprized as set forth herein of any developments during the course of the inquiry or investigation that may affect current or potential funding for the individual(s) under investigation or that the relevant agency needs to know to ensure appropriate use of external funds and otherwise protect the public interest.

### **IV. General Policies and Principles**

#### A. Protecting the Complainant

The RIO will monitor the treatment of individuals who bring allegations of research misconduct or of inadequate institutional response thereto, and those who cooperate in inquiries or investigations. The RIO will ensure that these persons will not be retaliated against in the terms and conditions of their employment or other status at the institution and will review instances of alleged retaliation for appropriate action. Employees should immediately report any alleged or apparent retaliation to the RIO.

Also the institution will protect, to the maximum extent possible, the privacy of those who report research misconduct in good faith. For example, if the complainant requests anonymity, the institution will make an effort to honor the request during the allegation assessment or inquiry within applicable policies and regulations and state and local laws, if any. The complainant will be advised that if the matter is referred to an Investigative Committee and the complainant's testimony is required, anonymity may no longer be guaranteed. The complainant may bring a personal advisor to interviews or meetings on the case. LSU AgCenter will undertake diligent efforts to protect the positions and reputations of those persons who, in good faith, make allegations.

#### B. Protecting the Respondent

Inquiries and investigations will be conducted in a manner that will ensure fair treatment to the respondent(s) and confidentiality, to the extent possible without compromising public health and safety or a thorough inquiry or investigation.

Covered individuals accused of research misconduct may consult with legal counsel or other personal adviser (who is not a principal or witness in the case) to seek advice and may bring the counsel or personal adviser to interviews or meetings on the case. Attorneys or other advisors will not be permitted to question witnesses or speak before the committee. The presence of a legal counsel representing the respondent during an inquiry or investigation will require the presence of legal counsel representing the LSU AgCenter.

### C. Preliminary Assessment of Allegations

Upon receiving an allegation of research misconduct, the RIO will immediately assess the allegation to determine whether there is sufficient evidence to warrant an inquiry, whether externally funded support or external support applications are involved, and whether the allegation falls under the definition of research misconduct for the relevant agency. Normally, the preliminary assessment by the RIO will be completed in one month or less. If the RIO deems an inquiry to not be warranted, he or she will so inform the individual who brought the allegation and any others made privy to the information in the course of the assessment.

### D. Method of Committee Member Participation

Committee members may attend meetings in person or electronically. However, committee members will attend interviews in person unless the RIO approves an exception for good cause.

### E. Adherence to Timeframes

The timeframes stated below are for the purposes of allowing sufficient time for proper inquiry or investigation while providing for a resolution within a reasonable period of time. The RIO may extend timeframes when there is good cause. Extensions and the reasons for them will be entered in the record.

### F. Additional Respondents

In the event that during this process additional respondents are identified, any proceedings against them will be instituted *de novo* with respect to processes defined in this policy. That is, if additional respondents are identified, this policy will be applied to each respondent from its beginning. At the RIO's discretion for good cause, usually when the charges appear to arise out of the same facts and circumstances, the original process may be put on hold until the prior steps in the policy are completed with regard to each such respondent. If the charges arise out of the same facts and circumstances, the RIO may consolidate the process provided the consolidation is done when all respondents are at the same stage in the process

## **V. Conducting the Inquiry**

### A. Initiation and Purpose of the Inquiry

Following the preliminary assessment, if the RIO determines that the allegation provides sufficient information to allow specific follow-up, and falls under the definition of research misconduct, he or she will immediately initiate the inquiry process and so inform the respondent in writing. In initiating the inquiry, the RIO will in writing identify clearly the original allegation and any related issues that should be evaluated and will submit it to the Deciding Official. The purpose of the inquiry is to make a preliminary evaluation of the available evidence and testimony of the respondent, complainant, and key witnesses to determine whether there is sufficient evidence of possible research misconduct to warrant an investigation. The purpose of the inquiry is not to reach a final conclusion about whether research misconduct occurred or who was responsible. The findings of the inquiry must be set forth in an inquiry report.

### B. Sequestration of the Research Records

After determining that an allegation falls within the definition of research misconduct, to the extent possible, the RIO will secure all original research records and materials relevant to the allegation. The RIO may consult with the US Public Health Service Office of Research Integrity, if appropriate, for advice and assistance in this regard.

### C. Appointment of the Inquiry Committee

After receiving the written recommendation of the RIO, the Vice President/Chancellor, if he/she agrees with the recommendation, will within 10 calendar days appoint the Inquiry Committee and committee chair, taking into consideration the recommendations of the RIO. The Vice President/Chancellor may also consider recommendations from other AgCenter faculty holding the role of Associate Vice President and Program Leader, if different from the RIO. If the inquiry concerns an individual who holds a joint appointment with another campus, a recommendation from the Dean of the College, or Executive Associate Dean of the College of Agriculture, or equivalent, may be considered. The Inquiry Committee, as defined under section II.I., will consist of individuals who do not have real or apparent conflicts of interest in the case and are unbiased; they will also have the necessary expertise to evaluate the evidence and issues related to the allegation, interview the principals and key witnesses, and conduct the inquiry.

After approval by the Deciding Official, the RIO will notify the respondent in writing of the allegations, the decision to proceed to inquiry, and the proposed committee membership within 5 calendar days. If the respondent submits a written objection to any appointed member of the Inquiry Committee based on bias or conflict of interest within 5 additional calendar days, the Deciding Official, in consultation with the RIO, will determine whether to replace the challenged member with a qualified substitute without expanding established time restrictions.

#### D. Charge to the Committee and the First Meeting

After appointment of the Inquiry Committee, the RIO will convene its first meeting within 10 calendar days. The RIO will present a written charge for the Inquiry Committee that describes the allegations and any related issues identified during the allegation assessment and states the purpose of the inquiry as defined under section V.A. A copy of the document will be provided to the respondent. At the committee's first meeting, the RIO will review the charge with the committee; discuss the allegations, any related issues, the appropriate procedures for conducting the inquiry, and the time line for completion of the report; assist the committee with organizing plans for the inquiry; and answer any questions raised by the committee. The RIO and institutional counsel will be available throughout the inquiry to advise the committee as needed.

#### E. Inquiry Process

The Inquiry Committee will normally interview the complainant, the respondent, and key witnesses as well as examine relevant research records and materials. All interviews will be tape recorded. The Inquiry Committee will then evaluate the evidence and testimony obtained during the inquiry. After consultation with the RIO and institutional counsel, the committee members will decide whether there is sufficient evidence of possible research misconduct to recommend further investigation. The Inquiry Committee will reach its determination considering all relevant factors, including, but not limited to: (1) the accuracy and reliability of the source of the allegation of the research misconduct, (2) the seriousness of the alleged research misconduct, (3) the scope of the alleged incident and the context in which it became known, and (4) other information obtained during the inquiry. The Inquiry Committee determination will be based on a majority vote, with the chair voting. The scope of the inquiry does not include deciding whether research misconduct occurred or conducting exhaustive interviews and analyses, nor does it include delving into issues not directly relevant to the allegation.

### **VI. The Inquiry Report**

#### A. Elements of the Inquiry Report

A written inquiry report must be prepared that states the name and position of the respondent(s); the name and title of the committee members and experts, if any; the allegations; the source of any relevant extramural research support, including grant numbers, grant applications, contracts, and publications listing the extramural research support; a summary of the inquiry process used; a list of the research

records reviewed; summaries of any interviews; a description of the evidence in sufficient detail to demonstrate whether an investigation is warranted or not; the committee's determination as to whether an investigation is recommended and whether any other actions should be taken if an investigation is not recommended; and any dissenting opinions. Institutional counsel will review the report for legal sufficiency.

#### B. Comments on the Draft Report by the Respondent and the Complainant

The Inquiry Committee will provide the RIO with a draft report within 40 calendar days following its first meeting. The Research Integrity Officer will provide the respondent with a copy of the draft inquiry report for comment and rebuttal and will provide the complainant, if he or she is identifiable, with portions of the draft investigation report containing his or her allegations or testimony.

1. Confidentiality: The RIO must establish reasonable conditions for review to protect the confidentiality of the draft report.
2. Receipt of Comments: Within 8 calendar days of their receipt of the draft report or the appropriate portions thereof, the complainant and respondent will provide their comments, if any, in writing to the Inquiry Committee. All comments that the complainant or respondent submits on the draft report will become part of the final inquiry report and record. Based on the comments, the Inquiry Committee may revise the report as appropriate.
3. Time Limit for Completing the Inquiry Report: The Inquiry Committee will normally complete the inquiry and submit its final report in writing to the RIO no more than 55 calendar days following its first meeting, unless the RIO approves an extension for good cause. If the RIO approves an extension, the reason for the extension will be entered into the records of the case and the report. The respondent also will be notified of the extension.

#### C. Inquiry Decision and Notification

1. Decision by Deciding Official: The RIO will transmit the final report and his or her recommendation to the Deciding Official, who will make the final determination of whether findings from the inquiry provide sufficient evidence of possible research misconduct to justify conducting an investigation. The inquiry is completed when the Deciding Official makes this determination, which will be made in writing within 5 calendar days of the submission to him or her of the final report. Any extension of this period will be based on good cause and recorded in the inquiry file.
2. Notification: The RIO will immediately notify the respondent, the complainant, and the committee in writing of the Deciding Official's decision of whether to proceed to an investigation and will remind them of their obligation to cooperate in the event an investigation is opened. The respondent and complainant will receive copies of the final report.

### **VII. Conducting the Investigation**

#### A. Initiation and Purpose of the Investigation

The purpose of the investigation is to explore in detail the allegations; to examine the evidence in depth; and to determine specifically, based on a preponderance of the evidence, whether research misconduct occurred, by whom, and to what extent. The investigation will also determine whether there are additional instances of possible research misconduct that would justify broadening the scope beyond the initial allegations. This is particularly important when the alleged research misconduct involves clinical trials or potential harm to human subjects or the general public or if it affects research that forms the basis for public policy, clinical practice, or public health practice. The findings of the investigation will be set forth in an investigation report.

## B. Sequestration of the Research Records

The RIO will immediately sequester any additional pertinent research records that were not previously sequestered during the inquiry. This sequestration should occur before or at the time the respondent is notified that an investigation has begun. The need for additional sequestration of records may occur for any number of reasons, including the institution's decision to investigate additional allegations not considered during the inquiry stage or the identification of records during the inquiry process that had not been previously secured. The procedures to be followed for sequestration during the investigation are the same procedures that apply during the inquiry.

## C. Appointment of the Investigative Committee

Within 10 calendar days of the notification to the respondent that an investigation is planned, or as soon thereafter as practical, the Vice President/Chancellor will appoint the Investigative Committee taking into consideration the recommendations of the RIO. The Vice President/Chancellor may also consider recommendations from other AgCenter faculty holding the role of Associate Vice President and Program Leader, if different from the RIO. If the inquiry concerns an individual who holds a joint appointment with another campus, a recommendation from the Dean of the College, or Executive Associate Dean of the College of Agriculture, or equivalent, may be considered. The Investigative Committee will consist of individuals who do not have real or apparent conflicts of interest in the case and are unbiased; the committee will also have sufficient expertise and ability to evaluate the evidence and issues related to the allegations, interview the principals and key witnesses, and conduct the investigation.

After approval of the proposed committee membership by the Deciding Official, the RIO will notify the respondent of the proposed committee membership within 5 calendar days. If the respondent submits a written objection to any appointed member of the Investigative Committee based on bias or conflict of interest within 5 additional calendar days, the Deciding Official, on recommendation from the RIO, will determine whether to replace the challenged member with a qualified substitute without expanding established time restrictions.

## D. Charge to the Committee and the First Meeting

The RIO will convene the first meeting of the Investigative Committee within 10 calendar days after appointment of the committee. The RIO will present a written charge for the Investigative Committee that describes the allegations and any related issues identified during the inquiry, defines research misconduct, and states the purpose of the investigation as defined under section VII.A. A copy of the document will be provided to the respondent. The Investigative Committee will also receive the Inquiry Committee's report. At the committee's first meeting, the RIO will review the charge with the committee; discuss the allegations, any related issues, the appropriate procedures for conducting the investigation, and the time line for completion of the report; assist the committee with organizing plans for the investigation; and answer any questions raised by the committee. The need for confidentiality will be emphasized. The RIO and institutional counsel will be available throughout the investigation to advise the committee as needed.

During the investigation, if additional information becomes available that substantially changes the subject matter of the investigation or would suggest additional respondents, the committee will notify the RIO, who will determine whether it is necessary to notify the respondent of the new subject matter or to provide notice to additional respondents. Any proceedings against additional respondents will be instituted *de novo* with respect to processes defined in this policy,

## E. Investigation Process

The Investigative Committee will be appointed and the investigative process initiated within 30 calendar days of the completion of the inquiry, if findings from that inquiry provide a sufficient basis for conducting an investigation. The investigation will normally involve examination of all documentation including, but not necessarily limited to, relevant research records, computer files, e-mail, proposals, manuscripts,

publications, correspondence, memoranda, and notes of telephone calls. Whenever possible, the committee will interview the complainant(s), the respondent(s), and other individuals who might have information regarding aspects of the allegations. An investigation may consist of a combination of activities including but not limited to: (1) review of readily available documents; (2) review and copying of data or other pertinent documents of the AgCenter or elsewhere; (3) inspection of laboratory or clinical facilities and/or materials at the AgCenter; (4) interviews of parties and witnesses who may have been involved in or have knowledge about the case; (5) review of scientific publications; (6) invitations to outside consultants to participate in an investigation, either as site visitors to the LSU AgCenter or in some other capacity; (7) review of any documents or evidence provided by or properly obtainable from parties, witnesses or other sources; (8) cooperation with other Federal agencies; (9) provision of opportunities for the subject of the allegations to be heard; and (10) full adjudicatory hearings or other formal proceedings as warranted. When relevant expertise is not available locally, the LSU AgCenter will secure necessary and appropriate expertise to carry out a thorough and authoritative evaluation of the relevant evidence. All interviews will be tape recorded. The Investigative Committee determination will be based on a majority vote, with the chair voting.

## **VIII. The Investigation Report**

### **A. Elements of the Investigation Report**

The final report must state the name and position of the respondent; name and title of the committee members and experts, if any; the allegations; the source of any relevant extramural research support; a summary of the inquiry process used; a list and summary of the research records reviewed, including any relevant records and evidence not taken into custody and why; summaries of any interviews; a description of the evidence in sufficient detail to demonstrate the basis for the findings; the findings for each separate allegation, and any dissenting opinions. The report will include the actual text or an accurate summary of the views of any individual(s) found to have engaged in research misconduct as well as a description of any recommended sanctions and administrative actions.

### **B. Comments on the Draft Report**

The Investigative Committee will provide the RIO with a draft report within 60 calendar days following its first meeting. The RIO will provide the respondent with a copy of the draft investigation report for comment and rebuttal and will provide the complainant, if he or she is identifiable, with portions of the draft investigation report containing his or her allegations or testimony. The respondent will be given a copy of, or supervised access to, evidence on which the report is based.

1. **Confidentiality:** The RIO must establish reasonable conditions for review to protect the confidentiality of the draft report. For example, the RIO may request that a recipient sign a confidentiality statement or come to his or her office to review the report.
2. **Receipt of Comments:** Within 10 calendar days of their receipt of the draft report or the appropriate portions thereof, the respondent will provide his/her comments, if any, in writing to the Investigative Committee. At the RIO's discretion, the complainant may also be afforded the same opportunity. Any comments that the complainant or respondent submits on the draft report will become part of the final investigation report and record. Based on the comments, the Investigative Committee may revise the report as appropriate.

### **C. Institutional Review and Decision**

1. **Decision by Deciding Official:** The RIO will transmit the final report and his or her recommendation to the Deciding Official. Institutional counsel will review the report for legal sufficiency. Based on a preponderance of the evidence, the Deciding Official will make the final determination whether to accept the investigation report, its findings, and the recommended institutional actions. If this determination varies from that of the Investigative Committee, the Deciding Official will explain in detail the basis for rendering a decision different from that of the

Investigative Committee. The Deciding Official's explanation should be consistent with the definition of research misconduct, the AgCenter's policies and procedures, and the evidence reviewed and analyzed by the Investigative Committee. The Deciding Official may also return the report to the Investigative Committee with a request for further fact finding or analysis. The Deciding Official's written determination, together with the Investigative Committee's report, constitutes the final investigation report. The Deciding Official's determination will be made in writing within 10 calendar days of the submission of the final report from the Investigative Committee. Any extension of this period will be based on good cause and recorded in the investigation file and report.

2. Notification: When a final decision on the case has been reached, the RIO will provide a copy of the final report to the respondent. Committee members will be provided an opportunity to view the final report. At the RIO's discretion, the complainant also may be provided a copy. In addition, in the event of a finding of research misconduct, the Deciding Official will determine whether professional societies, professional licensing boards, editors of journals in which falsified reports may have been published, collaborators of the respondent in the work, law enforcement agencies, or other relevant parties should be notified of the outcome of the case, and will initiate appropriate disciplinary action. The RIO is responsible for ensuring compliance with all notification requirements of funding or sponsoring agencies.

#### D. Time Limit for Completing the Investigation Report

An investigation should ordinarily be completed within 100 calendar days of its initiation, with the initiation being defined as the first meeting of the Investigative Committee. This includes conducting the investigation, preparing the report of findings, making the draft report available to the respondent and complainant for comment, and submitting the report to the Deciding Official for approval. The RIO may approve an extension for good cause. If the RIO approves an extension, the reason for the extension will be entered into the records of the case and the report. The respondent also will be notified of the extension.

### **IX. Requirements for Reporting to US Public Health Service Office of Research Integrity**

The US Public Health Service has specific reporting requirements for alleged research misconduct involving Public Health Service research funding, as specified below. Other agencies may likewise in the future also develop similar guidelines, with which the LSU AgCenter will comply.

A. For research funded by the US Public Health Service, an institution's decision to initiate an investigation must be reported in writing to the Director, Office of Research Integrity, on or before the date the investigation begins. The notification should include the written finding by the Deciding Official and a copy of the inquiry report. The Office of Research Integrity must also be notified of the final outcome of the investigation and must be provided with a copy of the investigation report, including supporting documentation and a copy of this policy. The notification should indicate whether research misconduct was found, whether the institution accepts the findings of the investigation; and a description of pending or completed administrative actions against the respondent. Any significant variations from the provisions of the institutional policies and procedures should be explained in any reports submitted to the Office of Research Integrity. Reporting requirements for other outside funding agencies will likewise be followed to the extent that such policies exist.

B. If an institution plans to terminate an inquiry or investigation for any reason without completing all relevant requirements of the Public Health Service regulation, the RIO will submit a report of the planned termination to the Office of Research Integrity, including a description of the reasons for the proposed termination.

C. If the institution determines that it will not be able to complete the investigation in the time period specified by federal regulations (120 days), the RIO will submit to the Office of Research Integrity a written request for an extension that explains the delay, reports on the progress to date, estimates the

date of completion of the report, and describes other necessary steps to be taken. If the request is granted, the RIO will file periodic progress reports as requested by the Office of Research Integrity.

D. When Public Health Service funding or applications for funding are involved and an admission of research misconduct is made, the RIO will contact the Office of Research Integrity for consultation and advice. Normally, the individual making the admission will be asked to sign a statement attesting to the occurrence and extent of research misconduct. When the case involves Public Health Service funds, the institution cannot accept an admission of research misconduct as a basis for closing a case or not undertaking an investigation without prior approval from The Office of Research Integrity.

E. The RIO will notify the Office of Research Integrity at any stage of the inquiry or investigation if:

1. Health or safety of the public is at risk, including an immediate need to protect human or animal subjects.
2. HHS resources or interests are threatened.
3. Research activities should be suspended.
4. There is reasonable indication of possible violations of civil or criminal law.
5. Federal action is required to protect the interests of those involved in the research misconduct proceeding.
6. The LSU AgCenter believes the research misconduct proceeding may be made public prematurely so that HHS may take appropriate steps to safeguard evidence and protect the rights of those involved.
7. The research community or public should be informed. [1]

## **X. Institutional Administrative Actions**

LSU AgCenter will take appropriate administrative actions against individuals when an allegation of research misconduct has been substantiated by determination of the Deciding Official.

If the Deciding Official determines that the alleged research misconduct is substantiated by the findings, he or she will decide on the appropriate actions to be taken, after consultation with the RIO.

## **XI. Other Considerations**

A. Termination of Institutional Employment or Resignation Prior to Completing Inquiry or Investigation

If the respondent, without admitting to the research misconduct, elects to resign his or her position prior to the initiation of an inquiry, but after an allegation has been reported, or during an inquiry or investigation, or is terminated by the institution for other reasons, the inquiry or investigation will proceed. If the respondent refuses to participate in the process after resignation, the committee will use its best efforts to reach a conclusion concerning the allegations, noting in its report the respondent's failure to cooperate and its effect on the committee's review of all the evidence.

B. Restoration of the Respondent's Reputation

If the institution finds no research misconduct and any appropriate outside funding agency concurs, after consulting with the respondent, the RIO will undertake reasonable efforts to restore the respondent's reputation. Depending on the particular circumstances, the RIO should consider notifying those individuals aware of or involved in the investigation of the final outcome, publicizing the final outcome in forums in which the allegation of research misconduct was previously publicized, and expunging all reference to the research misconduct allegation from the respondent's personnel file. Any institutional actions to restore the respondent's reputation must first be approved by the Deciding Official and respondent.

C. Protection of the Complainant and Others

Regardless of whether the institution or any outside funding agency determines that research misconduct occurred, the RIO will undertake reasonable efforts to protect complainants who made allegations of research misconduct in good faith and others who cooperated in good faith with inquiries and investigations of such allegations. Upon completion of an investigation, the Deciding Official will determine, after consulting with the complainant, what steps, if any, are needed to restore the position or reputation of the complainant. The RIO is responsible for implementing any steps the Deciding Official approves. The RIO may also take appropriate steps during the inquiry and investigation to limit or prevent any retaliation against the complainant.

#### D. Allegations Not Made in Good Faith

If relevant, the Deciding Official will determine whether the complainant's allegations of research misconduct were made in good faith. If an allegation was not made in good faith, the Deciding Official will determine whether any administrative action should be taken against the complainant.

#### E. Interim Administrative Actions

During any and all phases of an inquiry or investigation, institutional officials will take interim administrative actions, as appropriate, to protect Federal funds and ensure that the purposes of the Federal financial assistance are carried out.

### **XII. Record Retention**

After completion of a case and all ensuing related actions, the RIO will prepare a complete file, including the records of any inquiry or investigation and copies of all documents and other materials furnished to the RIO or committees. The RIO will keep the file for seven years after completion of the case to permit later assessment of the case. Appropriate agency officials of the relevant funding agency may request access to the documents through the Deciding Official. After seven years the records will be destroyed.

### **Appendix**

The following list is a combined flowchart and time line for the handling of allegations of research misconduct. The reader is referred to the full policy for more detailed explanations. All references to days refer to calendar days.

#### I. Initial evaluation

Allegation of research misconduct received and evaluated by RIO; if inquiry indicated, RIO recommends and DO appoints Inquiry Committee and chair within 10 days of RIO's recommendation.

#### II. Inquiry

##### 1. Appointment of committee

Within 10 days of recommendation, DO appoints committee

Within 5 days of appointment, RIO informs respondent

Within 5 days of being informed, respondent reports any objections

Within 10 days of finalizing committee, RIO convenes first meeting, which initiates the inquiry

## 2. Committee inquiry

Committee conducts inquiry

Within 40 days of first committee meeting, draft report to RIO, respondent, appropriate portions to the complainant for comment and rebuttal

Within 8 days of receiving report, respondent and complainant provide any written comments on draft

Within 55 days of first committee meeting, final report due to RIO

## 3. Deciding official

RIO forwards report and recommendations to DO

Within 5 days of receiving report, DO makes determination and sends written decision to respondent, complainant, and committee

If sufficient evidence exists for investigation, DO appoints Investigative Committee within 10 days of receiving report

If insufficient evidence is found, all reasonable efforts are made to restore respondent's reputation

**Total days from initiation of inquiry to notification of respondent: 60**

## III. Investigation

### 1. Appointment of committee (note overlap of II.1. above)

Within 10 days of recommendation, DO appoints committee and chair

Within 5 days of appointment, RIO informs respondent

Within 5 days of being informed, respondent reports objections

Within 10 days of finalizing committee, RIO convenes first meeting, which initiates the investigation

### 2. Investigation

Committee conducts investigation

Within 60 days of first committee meeting, draft report due to RIO, respondent, appropriate portions to complainant for comment and rebuttal

Within 10 days of receiving report, respondent and complainant provide any written comments on draft

Within 90 days of first committee meeting, final report due to RIO

### 3. Deciding Official

Within 10 days of receiving report, DO makes a final written determination of whether to accept report, its findings, and recommended institutional actions, and RIO immediately provides respondent and complainant copies of final report and informs committee of the determination

If finding of research misconduct is not made, all reasonable efforts are made to restore the respondent's reputation

**Total days from initiation of investigation to notification of respondent: 100**

Any extension of these periods must be approved by the RIO, and will be based on good cause and recorded in the inquiry or investigation file and report.
