

Agronomic Crops: Production and Pest Management Research & Extension Programs

The LSU AgCenter Dean Lee Research and Extension Center is located in the Central Region, along with 10 parish extension offices. The intern will have an opportunity to work with faculty at the station as well as with specialists and parish agents. The internship experience will focus on agronomic and pest management research and extension programs for field crops produced in the region.

Preferred Qualifications: Rising Juniors and Seniors preferred. A 3.0 GPA is required. Those seeking an agriculture related degree are preferred. The ability to work out of doors is required.

Number of positions available for this placement: 1

Location: LSU AgCenter's Dean Lee Research Center

Primary Mentor: Dr. Daniel Stephenson, Professor and Research Coordinator
Dean Lee Research Station dstephenson@agcenter.lsu.edu

Anticipated Tasks:

Identification of a special topic research issue to focus on. Assist with research trials and on-farm extension related programming. Summarize and present results.

Expected Outcome: Enhanced knowledge of field crops production agriculture.
