

Applied Plant and Molecular Breeding

Location:

LSU AgCenter Rice Research Station in Crowley, Louisiana

Available Positions: 1

Primary Mentor/Contact:

Dr. Adam Famoso

AFamoso@agcenter.lsu.edu

Anticipated Tasks:

This internship will provide a broad exposure to the various activities and technologies that go into the breeding and development of new rice varieties. There will be a significant field component that will involve working in a rice field, as well as a lab component which will involve molecular marker applications. The student will work individually as well as in team settings.
